G A P

O Sofá Gap leva aconchego para qualquer sala de estar. Isso porque o seu assento e o seu encosto possuem percintas elásticas e espuma de média densidade revestidas com manta de espuma Ecosoft. Além disso, as almofadas do encosto são soltas e feitas de fibra poliéster e flocos de espuma. O Gap é super-resistente, com uma estrutura de madeira de eucalipto de reflorestamento e chapas de MDF, fazendo com que o sofá faça menos rangidos. Com tanto conforto, nem precisava ser tão bonito.

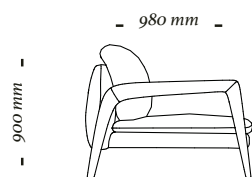

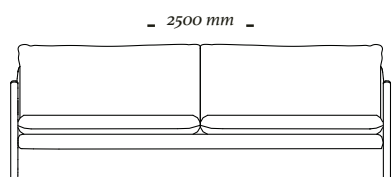

ESTRUTURA

O produto possui estrutura em madeira de eucalipto de reflorestamento, chapas MDF, montadas com grampos de aço e fixos com cola PVA (própria para madeira), proporcionando assim grande resistência e evitando rangidos no produto. O modelo ainda possui braços/pés de madeira maciça, o que lhe confere um visual moderno e, mesclado com o conforto das almofadas, aconchegante. O assento e o encosto possuem percintas elásticas e espuma de média densidade revestidas com manta de espuma Ecosoft. As almofadas do encosto são soltas e compostas por fibra poliéster e flocos de espuma, o que confere grande conforto e praticidade.

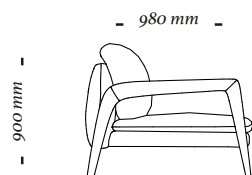

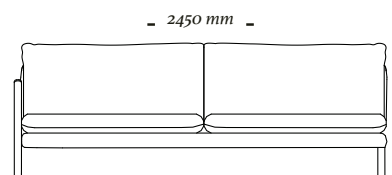

ACABAMENTO

Os acabamentos para o braço de madeira são: 079 - 148 - 145. Revestimentos liberados: Toda a cartela de tecidos Uultis, incluindo couro. Restrito tecidos listrados.
